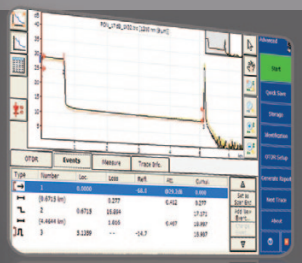
ALL YOUR ESSENTIAL TESTING NEEDS—ONE SINGLE PLATFORM



OTDR | FTB-730 PON FTTx/MDU

Seamlessly build PON networks in a new world of connectivity

PON-optimized (up to 1x128)
> Avoid turn-up failures at splitters

No training-time required
> Simple to use—same GUI as the FTB-200 platform

Flexible test management and reporting
> HTML and PDF formats for in-field reporting and completing test routines

Ethernet | FTB-860 NetBlazer Series

Powerful, fast, intuitive 10M-to-10G Ethernet testing

Increased autonomy and productivity
> Streamlined navigation and intelligent autodiscovery

Rapid, accurate test results
> Multistream traffic generation and bidirectional EtherSAM and RFC 2544 test suites

Future-proof investment
> Field-upgradeable software

ConnectorMax Analysis Software

with the FIP-400 Fiber Inspection Probe

Eliminate guesswork and achieve clear-cut end-face analysis

Automatic pass/fail analysis with multiple-platform flexibility
> Available on the portable FTB-1, FTB-200 and FTB-500 platforms

Save time and money
> Lightening-fast results in seconds through simple one-touch operation

Complete test reports for future referencing
> Stores images and results for record keeping
