# FTB-1v2 Pro platform

## EMPOWERING FRONTLINE TECHNICIANS

The FTB-1v2 Pro, also known as the FTB-1 Pro, is a portable system designed for fast and powerful optical, Ethernet, time-division multiplexing (TDM) and multiservice applications.

## PART OF THE EXFO FTB ecosystem

## **KEY FEATURES**

**Connects anywhere:** USB, mobile, WiFi, virtual private network (VPN) and Bluetooth\*

**Loaded with utilities:** equipped with all the tools needed to optimize field testing, plus any third-party applications

**Like a PC:** available with a dual- or quad-core processor and Windows operating system

**EXFO Connect-ready:** automated asset management; data goes through the cloud and into a dynamic database

**Reporting:** market-leading onboard PDF reporting solution and essential PC-based post-processing included for all users

Single- or dual-carrier configuration available to slot FTBx test modules.

See next page for the list of supported modules.

High-power dual-carrier configuration available for the FTB-1v2 Pro supporting simultaneous 100G quad port testing.

See next page for the list of supported modules

## **RELATED PRODUCTS**

Fiber inspection scope FIP-400B (WiFi or USB)

#### ADAPTED FOR DEDICATED APPLICATIONS. DEDICATED TO HELPING YOU ADAPT.

Thanks to its small format, ultra-powerful processing and highly intuitive interface, the FTB-1v2 Pro is optimized to allow field technicians to carry out dedicated optical, Ethernet and multiservice test applications simply and efficiently.

#### **APPLICATIONS**

#### Access fiber network testing

The ideal construction and troubleshooting OTDRs for everyday field testing in any access network, such as PON FTTx (up to 1×32 splitter), fiber-to-the-antenna (FTTA) and distributed antenna systems (DAS).

#### LAN/WAN and data center fiber testing

OTDR for certification and troubleshooting of any enterprise and data center fiber networks.

#### FTTx/MDU fiber network testing

Seamlessly characterizes splitters in PON FTTx applications (up to 1×128 splitter), as well as troubleshoot in-service with the in-line dual-channel PON power meter and live OTDR wavelengths.

#### Metro/FTTx fiber network testing

High-resolution OTDR designed for metro network testing and splitter characterization in PON FTTx applications (up to 1×128 splitter).

#### Longhaul fiber network testing

High dynamic range combined with high resolution for highly accurate fiber characterization on any longhaul network.

#### 10G dual-port multiservice testing \*

Easily turn up, validate and troubleshoot OTN, SONET/SDH, DSn/PDH, ISDN/PRI, CPRI, Fibre Channel and Ethernet services up to 10 Gbit/s in converged optical networks.

#### 100G multiservice

#### 100G dual-port multitechnology and multiservice testing <sup>a</sup>

The most comprehensive all-in-one tester, including testing for legacy networks at 64K all the way up to next-generation networks at speeds of 100G.

#### Fronthaul/Backhaul testing (mobile backhaul, FTTA/remote radio heads, DAS and small cells) <sup>a</sup>

All-in-one optical/Ethernet/CPRI solution combining the best of fiber test capabilities (inspection, iOLM/OTDR) with a wide range of Ethernet and multiservice tests (OTN, SONET/SDH, Fibre Channel, GigE/10 GigE, CPRI/OBSAI and SyncE/1588 PTP). Designed to streamline field operations when installing, activating and troubleshooting any type of fiber-fed wireless infrastructure.

## **OPTICAL PLUG-AND-PLAY OPTIONS**

The platform features optical plug-and-play options that can be purchased whenever you need them: at the time of your order or later on. In either case, installation is a snap, and can be performed by the user without the need for any software update.

#### **Optical power meter**

A high-level power meter (GeX) that can measure up to 27 dBm, the highest in the industry. This is essential for hybrid fiber-coaxial (HFC) networks or high-power signals. If used with an auto-lambda/auto-switching compatible light source, the power meter automatically syncs on the same wavelength, thus avoiding any risk of mismatched measurement.

- Extensive range of connectors
- · Auto-lambda and auto-switching
- · Offers measurement storage and reporting
- · Choice of seven standard or coarse wavelength-division multiplexing (CWDM)-calibrated wavelengths

#### Visual fault locator (VFL)

The plug-and-play VFL easily identifies breaks, bends, faulty connectors and splices, in addition to other causes of signal loss. This basic, yet essential, troubleshooting tool should be part of every field technician's toolbox. The VFL visually locates and detects faults over distances of up to 5 km by creating a bright-red glow at the exact location of the fault on singlemode or multimode fibers (available with the optical power meter only).

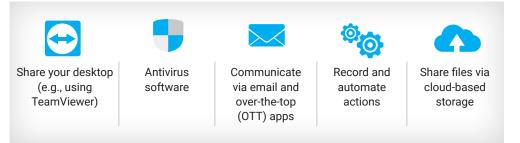

## **DO MORE!**

The Windows 10 operating system allows for a wide choice of third-party applications and supports an extensive range of USB devices.

- Start faster and multitask
- Use the Office suite
- · Connect to printers, cameras, keyboards, mice, and more

#### Bring your own apps

## FIBER CONNECTOR INSPECTION AND CERTIFICATION-THE ESSENTIAL FIRST STEP BEFORE ANY OTDR TESTING

Taking the time to properly inspect a fiber-optic connector using an EXFO fiber inspection scope can prevent a host of issues from arising further down the line, thus saving you time, money and trouble.

#### The first fully automated fiber inspection scope for the field

Housing a unique automatic focus adjustment system, the FIP-430B USB and FIP-435B WiFi scopes automate each operation in the connector endface inspection sequence, transforming this critical process into one quick and easy step, which can be performed by technicians of all skill levels.

## SIMPLE SETUP IN THREE STEPS

## SOFTWARE TEST TOOLS

This series of platform-based software testing tools enhance the value of the FTB-1v2 Pro platform, providing additional testing capabilities without the need for additional modules or units.

#### Wireshark-Third-party test tools

This live-network packet-capture utility makes it possible to look inside the packets and obtain data, including transmission time, source, destination and protocol type. Users can then diagnose a problem or root out suspicious behavior.

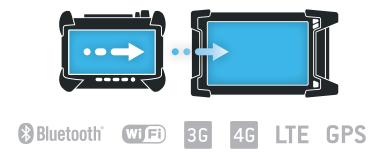

EXpert Test Tools	
	EXpert VoIP generates a voice-over-IP call directly from the test platform to validate performance during service turn-up and troubleshooting.
EXpert VOIP	<ul> <li>Supports a wide range of signaling protocols, including SIP, SCCP, H.248/Megaco and H.323</li> </ul>
TEST TOOLS	<ul> <li>Supports mean-opinion-score (MOS) and R-factor quality metrics</li> </ul>
	<ul> <li>Simplifies testing with configurable pass/fail thresholds and RTP metrics</li> </ul>
	EXpert IP integrates six commonly used datacom test tools into one platform-based application to ensure that field technicians are prepared for a wide range of testing needs.
EXpert IP	<ul> <li>Rapidly performs debugging sequences with VLAN scan and LAN discovery</li> </ul>
TEST TOOLS	<ul> <li>Validates end-to-end ping and traceroute</li> </ul>
	• Verifies file-transfer-protocol (FTP) performance and hypertext-transfer-protocol (HTTP) availability
	This powerful Internet-protocol-television (IPTV) quality assessment solution enables set-top box emulation and passive monitoring of IPTV streams, allowing for quick and easy pass/fail verification of IPTV installations.
EXpert IPIV	Real-time video preview
TEST TOOLS	<ul> <li>Analyzes up to 10 video streams</li> </ul>
	<ul> <li>Comprehensive quality-of-service (QoS) and quality-of-experience (QoE) metrics, including the MOS score</li> </ul>
Software applications	
ConnectorMax	Providing lightning-fast results during the first step of fiber-link testing, ConnectorMax2 is a powerful, platform-based automated inspection application that delivers quick pass/fail assessment of connector endfaces, and which is specifically designed to save both time and money in the field.
FastReporter	Consolidated data management and post-processing tool designed to increase reporting productivity for connector endface inspection and all types of optical-layer testing: intelligent Optical Link Mapper

for connector endface inspection and all types of optical-layer testing: intelligent Optical Link Mapper (iOLM), OTDR, ORL and loss.

#### **CONNECTED ANYWHERE, ANYTIME**

The value of connectivity resides in the ability to connect your platform anywhere, at any time. This is why we've equipped our platforms with technology offering unprecedented flexibility. Whether you need to transfer data to the cloud or interface with a smart device, you'll have the capability needed.

#### Secure VPN communications

Offers the ability to install and configure any VPN client solution defined by your IT department. Secure communications are now within your reach.

A

#### 3G/4G/LTE mobility

Get connected wherever you are: choose any Windows-supported 3G/4G/LTE USB dongle and connect to your wireless service provider.

#### Remote control

Use remote assistance to troubleshoot units in the field, trigger tests remotely, or help a technician with a problem. Working without it is hard to imagine.

#### Instant messaging

Because our platforms are Windows-based, they function just like PCs. You can even use chat tools to quickly communicate with your team members.

# EXFO C nnect

## **EXFO CONNECT MAKES YOUR DATA MEAN BUSINESS**

EXFO Connect completely redefines integrated testing with its cloud-hosted solution. Equipped with powerful database and application technologies, EXFO Connect provides an automated, secure environment that links together your EXFO test instruments and centralizes captured data across your organization. With its powerful correlation engine, EXFO Connect enables you to convert captured data into actionable information through customized test-data reporting and features that streamline test operations from build-out to maintenance.

#### **Test Equipment Manager**

EXFO Connect's Test Equipment Manager is an automated application that centralizes the management of all EXFO test instruments. A repository for software loads, licenses and platform profiles, it helps managers handle constant demand for software updates. It also keeps track of equipment and ensures field technicians are equipped with up-to-date capabilities.

## Test Data Manager

EXFO Connect's Test Data Manager is an automated application that provides a secure and centralized environment in which test data is collected, archived and referenced for future use. With test results at their fingertips, managers can create birth certificates, generate reports and set benchmarks.

#### FTB Anywhere: Floating test licenses

FTB Anywhere<sup>™</sup> is a shared test-license capability for the award-winning FTB Ecosystem. This unique approach to delivering advanced test applications enables network operators to purchase a specific number of cloud-hosted licenses that can be shared instantly with their technicians, wherever they happen to be.

## **DESIGNED FOR EFFICIENCY**

## BUILT-IN POWER METER SPECIFICATIONS (GeX) (optional) <sup>d</sup>

Calibrated wavelengths (nm)	850, 1300, 1310, 1490, 1550, 1625, 1650
Optional CWDM calibrated wavelengths (nm)	1270, 1290, 1310, 1330, 1350, 1370, 1390, 1410, 1430, 1450, 1470, 1490, 1510, 1530, 1550, 1570, 1590, 1610, 1383 and 1625
Power range (dBm)	Typical 27 to -50
Uncertainty <sup>e, f</sup>	±5 % ± 10 nW
Display resolution (dB)	0.01 = max to −40 dBm 0.1 = −40 dBm to −50 dBm

#### VISUAL FAULT LOCATOR (VFL) (optional)

Laser, 650 nm ± 10 nm

#### CW/Modulate 1 Hz

Typical  $P_{\mbox{\tiny out}}$  in 62.5/125  $\mu\mbox{m:}$  > –1.5 dBm (0.7 mW)

Laser safety: Class 2

a. All specifications valid at 23  $^\circ\text{C}$  (73  $^\circ\text{F}).$ 

b. -20 °C to 60 °C (-4 °F to 140 °F) with the battery, and -20 °C to 45 °C (-4 °F to 113 °F) for long-term storage.

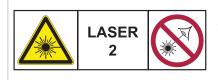

c. Platform with batteries and without module.

d. At 23 °C ± 1 °C, 1550 nm and FC connector. With modules in idle mode. Battery-operated after warm-up.

e. Typical.

f. At calibration conditions.

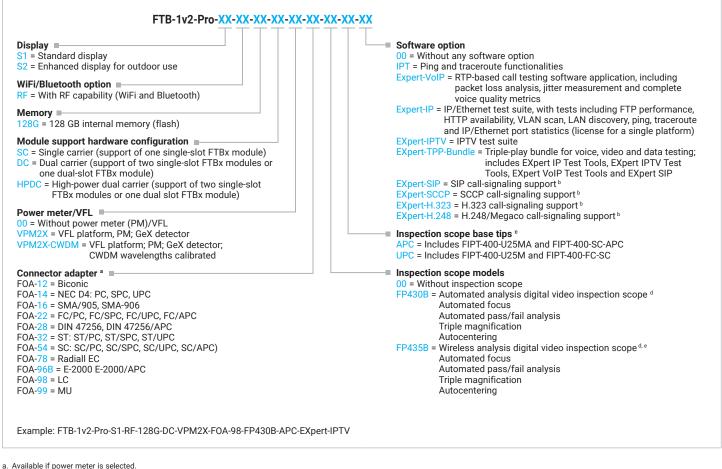

#### LASER SAFETY

The test modules that you use with your unit may have different laser classes. Refer to the module's documentation for exact information.

#### **ORDERING INFORMATION**

- b. Available if EXpert VoIP selected
- c. Available if inspection scope is selected.
- c. Available if inspection scope is sele
- d. Includes ConnectorMax2 software.
- e. Requires RF capability (WiFi and Bluetooth option)
