

COMPACT IN HAND, GIANT IMPACT

EXFO's AXS mini-OTDR series MINI YET MIGHTY

Optical link mapper (OLM)

Automatic analysis of multiple wavelengths with a consolidated icon-based link view.

Optimized display

Key results, settings, OTDR trace, linear view and the OLM—on a single screen.

Connectivity

Store and share test results, streamlines workflows, and ensures compliance via EXFO Exchange.

Swap-Out connectors

Avoid repair downtime with these field replaceable connectors.

Integrated testing essentials

In-line light source and power checker on the same port as well as a VFL.
