Validate. Troubleshoot. Optimize.

Validate bandwidth speeds up to 10 Gigabit Ethernet and test residential WiFi 6E for optimal QoE.

EX10

Multigigabit residential & business services tester

- Supports GPON, XGS-PON with PON ID, ONU ID and transmit optical loss (TOL)
- Multigigabit validation including 1, 2.5, 5 and 10 Gigabit interfaces
- Latency, download and upload throughput performance metrics with adjustable pass/fail thresholds
- Efficient job closeout with best-in-class birth certificate generation

Pick the feature that best suits your needs:

Residential: for validating quality of experience (QoE)

GPON / XGS-PON: for service activation and troubleshooting

WiFi 6E: for high-rate WiFi speed optimization

Speedtest® by Ookla®
