

# MaxTester 630G

## VALIDATION OF GFASST AND BROADBAND RESIDENTIAL SERVICES

- Install and troubleshoot Gfast, VDSL2 and ADSL2+ broadband deployments up to 1 Gbit/s and validate in-home multiplay performance metrics.

EXFO Sync

EXFO Connect  
compatible

### KEY FEATURES

Gfast with backwards compatibility to VDSL2 and ADSL2+, all-in-one test tool

VDSL2 and ADSL2+ bonding enables operators to increase rates and/or reach to subscribers

Spectrally compatible VDSL2 35b support

Verify internet throughput using Speedtest™ by Ookla®, the industry's standard solution. Validate IPTV and VoIP services for quality-of-service (QoS) assurance

Configurable pass/fail results for automated scripted testing

Upload results to the cloud directly or via the EXFO Sync mobile application for additional post-analytics

High-resolution, 6-inch touchscreen with dual GigE ports

Designed to face the challenges of the outside plant environment, with an IEC IP54 rating

### APPLICATIONS

FTTx/MDU Gfast, VDSL2 35b and VDSL2 vectored installations

Bonded VDSL2 and bonded ADSL2+ deployments

Multiplay service assurance, inclusive of internet throughput validation using Speedtest™ by Ookla®

FTTdp deployments

Gfast-based mobile backhaul, DAS or small cell deployments

Cloud-based test asset management available through EXFO Connect

Validate bandwidth performance and speed, using Speedtest™ by Ookla®, HTTP, FTP, or iPerf

### THE MAXTESTER SERIES

Copper, VDSL2,  
multiplay test solutions  
MaxTester 600 Series

OTDR  
MaxTester 700B Series

Fiber certifier OLTS  
MaxTester 940

## FAST VALIDATION OF ULTRA-BROADBAND DEPLOYMENTS

The MaxTester 630G (MAX-630G) is the perfect tool for any service provider deploying Gfast (ITU-T G Series 9700 and 9701 recommendations for fast access to subscriber terminals) in FTTdp or MDU deployments. For service providers considering Gfast as a future play for their FTTx broadband deployments, the MAX-630G offers key features today, including: VDSL2 35b, vectoring enabled VDSL2, VDSL2 bonding and ADSL2+ and, single pair and bonded pair capability. Field-upgradeable software offers the ability to upgrade to Gfast in seconds. The MAX-630G's small form factor, rugged design and easy-to-use menu make it the ideal tool for installation and repair technicians. The large touchscreen display makes it intuitive and user-friendly. With the MAX-630G, the testing process is highly automated and technicians can close their jobs quickly and efficiently thanks to clear pass/fail test result conclusions. When it comes to saving results, it provides technicians with many connectivity options for uploading tests and compiling reports.

## MULTIPLAY PERFORMANCE MANDATE

Ultra-broadband Gfast and enhanced VDSL2 variants (such as new VDSL2 35b deployments) are driven by subscriber requirements for flawless IPTV and over-the-top (OTT) video, high speed downloads and uploads, social networking push and pulls, and online gaming (e.g., MMORPG), to name a few. The MAX-630G allows technicians to connect subscriber equipment (e.g., a PC, STB or gaming console) to the its LAN port to transfer Gfast data at speeds up to 1000 Mbit/s. The MAX-630G offers service providers and contractors the same TCP throughput test methods that subscribers use today; namely the Speedtest by Ookla, which is the industry's standard solution. With Speedtest by Ookla, technicians will be able to validate the bandwidth available to the subscriber.

The MAX-630G offers 2.4/5 GHz WiFi scanning capability to provide technicians the ability to validate signal strength (RSSI) in the customer premise. Improperly placed modems, residential gateways (RG), routers, and/or set top boxes (STB) can impact WiFi performance and frustrate customers if quality WiFi is not available.

## NOISE MITIGATION FEATURES

Ensuring that the highest quality multiplay services are delivered to subscribers is critical for service providers deploying ultra-fast broadband connectivity. With an aging copper plant and the need to maximize the use of all pairs in the cable bundle, it is imperative that the appropriate mechanisms are in place to mitigate the impact of noise. Noise is a key contributor to negative multiplay feedback from subscribers. The MAX-630G supports INP (impulse noise protection), G.INP (impulse noise protection and physical-layer retransmission as defined by ITU-T G.998.4) and vectoring (ITU-T G.993.5) plus a complete set of DELT measurements for attenuation, noise and SNR per tone analysis up to 106 MHz. These techniques are supported by the MAX-630G to ensure consistency with service providers' noise mitigation methods and procedures.

## KEY CHARACTERISTICS

## ALL THE RIGHT FEATURES FOR INSTALLATION TECHNICIANS

With its small form factor, the MAX-630G can go anywhere the technician does. It is rugged, lightweight and protected from the rain—just what is needed for the demanding outside-plant environment. The user interface was designed with simplicity and efficiency in mind. The large touchscreen display features colored icons and graphics for easy configuration and operation, and is simple to use for both experienced and novice technicians.

## AUTOMATED SERVICE TESTING

Customizable profiling makes testing ultra-broadband circuits with the MAX-630G easy. Run routine jobs or setup custom profiles for special projects. Test profiles can easily be transferred between units using a USB or EXFO Connect, ensuring that all technicians from the same organization are testing to the same specifications. In addition, the MAX-630G boasts customizable thresholds allowing all technicians to visualize pass or failed conditions so they can quickly move on to the next job or investigate further.

## DATA MINING OF RESULTS

In today's highly competitive network service provider environment, delivering exceptional quality of service to subscribers is paramount. With EXFO Connect and EXFO Sync combined with the MAX-630G, service providers can manage their fleet of MaxTester units and ensure that they have the most up-to-date software installed and properly configured. Combining these solutions with the MAX-630G makes it possible for service providers to have test results on hand for data mining and post-analytics purposes, enabling them to proactively manage loop plants and ensure that they are of the highest quality.

**AUTOMATE ASSET MANAGEMENT. GET CONNECTED.**

The EXFO Connect cloud-hosted solution provides an automated, secure environment that links your EXFO test instruments together and enables the management of your deployed inventory of test sets.

EXFO Connect enables automated downloads of latest software versions to all test sets in the field to ensure consistency of testing across the organization. Test profiles and threshold settings may also be deployed to all units, to mandate testing according to the latest procedures. Enable EXFO Connect on your fleet of MaxTester units to improve operational efficiency at all levels of your business.

**KEY FEATURES**

		
<b>TEST EQUIPMENT MANAGER</b> Automated inventory tracking and software download	<b>FILE MANAGER</b> Download/upload files, work orders, test configurations or procedure documents	<b>CONTRACTOR MODE</b> Secure, segregated access for test-result upload, and automated file download

Visit [EXFO.com/EXFOConnect](http://EXFO.com/EXFOConnect) for details and features compatibility with the MaxTester handheld series.

**REAL-TIME COPPER TEST RESULTS UPLOAD—STRAIGHT FROM THE FIELD**

Working in the field with an Android™ or iOS™ device?  
Download the EXFO Sync application for your smart device.\*

EXFO Sync is an app (runs on Android and iOS) that operates together with the MaxTester 630G, DSL and IP field test set. It provides a fully automatic DSL test script and WiFi transfer of the results files to a phone or tablet for upload to the customer's server.

With EXFO Sync, your copper test results can be uploaded in real-time to a central location for access and further analysis to identify trouble patterns, assess technician performance or target customers for upsell to higher revenue services.

- Copper test result are uploaded, live from the site
- GPS tagging gives visibility of location of test for mapping of test history and network performance
- Ensure compliance to service provider workflow process
- Flexibility to upload test results to an FTP or HTTPS server
- Secure, password-protected connection to upload and access results

\* Upload to smart devices is supported only over WiFi and only for the DSL autotest.

## GFAST/DSL SPECIFICATIONS

DSL chipset	Broadcom 63138	
Standards compliance	ADSL1/2/2+	<ul style="list-style-type: none"> <li>• ITU-T G.992.5 (ADSL2+ including annex A, B, J, and M)</li> <li>• ITU-T G.992.3 (ADSL2 including annex A, B, J and L)</li> <li>• ITU-T G.992.1 (G.DMT including annex A and B)</li> <li>• ITU-T G.994.1</li> <li>• ATIS/ANSI T1.413 issue 2</li> <li>• IEEE 802.3ah (PTM)</li> <li>• ITU-T G.998.1, 2 (ATM, Ethernet bonding)</li> <li>• ITU-T G.998.4 (G.INP)</li> <li>• ITU-T G.992.5 (INP amendment)</li> <li>• DT 1 TR 112 U-R</li> </ul>

## GENERAL SPECIFICATIONS

Display	Touchscreen TFT LCD with backlight 152 mm (6 in) diagonal 800 x 480 resolution, WVGA	
Test connections	RJ11 for Gfast/ADSL2+/VDSL2 RJ45 for Ethernet 10/100/1000 WAN RJ45 for Ethernet 10/100/1000 LAN	
Results management	1.2 GB internal memory	
Temperature	Operating	0 °C to 40 °C (32 °F to 104 °F)
	Storage	-20 °C to 60 °C (-4 °F to 140 °F)
Relative humidity	5 % to 95 %, non-condensing	
Shock	1 m (39 in) drop per GR-196-CORE	
Altitude	3000 m (9842 ft)	
Input power	12 VDC, 4.16 A, 48 W via 90-264 VAC adapter	
Battery	Internal rechargeable lithium polymer, with battery-state and level indications, adjustable auto-power down	
Safety	CE and CSA marked	
Size (H x W x D)	254 mm x 124 mm x 62 mm (10 in x 4 7/8 in x 2 7/16 in)	
Weight (with battery)	1.5 kg (3.3 lb)	
Water/dust ingress	Designed to comply with IP54	
Self-test	Routine on power-up	
Connectivity	USB 2.0 client ports (2) USB type B host port (1) Optional WiFi support	
Languages	English, French, German, Italian, Polish and Spanish	

## ACCESSORIES

<b>Standard</b>	ACC-RJ11-TC or ACC-RJ11-4MM	DSL test cables: RJ14 to RJ11 and telco clip with bed of nails or RJ14 to RJ11 and 4 mm plugs with crocodile clips
	Certificate of compliance	
	ACC-48WPS	AC adapter
	GP-10-061	Soft carrying case
<b>Optional</b>	ACC-BD-RJ or ACC-BD-TC or ACC-BD-4MM	DSL bonded test cables: RJ14 to dual RJ11 or RJ14 to four telco clips with bed of nails or RJ14 to four 4 mm plugs with crocodile clips
	ACC-12VLGB	12 V vehicle charger
	ACC-LGLOVE	Form fitting, protective soft glove with shoulder strap
	ACC-RJRJ-UTP	RJ45 Ethernet cable
	ACC-GFAST-BALUN	RJ11 to coax balun for Gfast operation over in-home coaxial networks
	GP-2053	USB host/client cable
	GP-2260	Bluetooth nano USB dongle V4.0 + EDR
GP-2272	MaxTester 600 screen protector film (Pkg 2)	

## ORDERING INFORMATION

MAX-630G-XX-XX-XX

## DSL version ■

GVXAA = ADSL2+ Annex A  
 GVXAB = ADSL2+ Annex A+B

## Platform options ■

00 = Without software options  
 FTPUPLD = Result upload via FTP over WiFi, Ethernet or DSL

## ■ Software options

00 = Without software options  
 BOND = ADSL2+ and VDSL2 bonding support<sup>a,e</sup>  
 GFAST = Gfast modem emulation  
 IPTV = IPTV analysis  
 IPV6 = IPv6 support for LAN/WAN connectivity  
 MOS = MOS/R-factor for VoIP calls<sup>b</sup>  
 VDSL2MOD = VDSL2 modem emulation  
 VDSL2-35B = VDSL2-35b profile support<sup>c</sup>  
 VOIP = VoIP emulation  
 SPEED = Bandwidth speed test<sup>d</sup>  
 WIFI = 2.4 GHz WiFi scanning capability  
 MPP = Combines IPTV, VOIP, and MOS options

Example: MAX-630G-GVXAA-FTPUPLD-VDSL2MOD-GFAST-BOND-IPTV

- a. VDSL2MOD option required to enable VDSL2 bonding capability  
 b. VoIP option required  
 c. VDSL2MOD option required to enable VDSL2-35b capability  
 d. SPEED included with base unit  
 e. BOND option not available for GVXAB version
